

The Hammersley Group has been leading the market in specialty chemical innovation since 1972. Collectively, our award winning group of companies represent an accumulation of outstanding research & technology within a variety of specialised markets – automotive, marine, mining, agriculture, construction, hospitality, and commercial & domestic cleaning. Our reputation has been gained from our dedication to working closely alongside our customers to ensure we deliver a product that exceeds expectation and truly makes a difference to their operations.

We stand proudly behind every Hammersley product, offering your business a unique opportunity to rise above your competitors through use of our unrivalled chemical expertise & technology.

*Welcome to The Hammersley Group  
we look forward to working with you.*

# HAMMERSLEY *PRO form* AUTOMOTIVE

**PROFESSIONAL PERFORMANCE  
AUTOMOTIVE CARE**

Purposefully crafted by demand of luxury car distributors, the Proform Automotive range offers unrivalled performance in the very highest quality format. The comprehensive Proform range offers full service care and maintenance to make your vehicles stand out from the crowd every time.

**INTERIOR**

**INTERIOR CLEANER**

A high efficiency, safe to use, water based cleaner. Perfect for interior cleaning of motor vehicles including vinyl, carpets, door trims and any other area. Removes the toughest grime without hard rubbing. Dries leaving no residue.

**RENEW IT**

A luxurious conditioning leather and vinyl protectant. Non film forming and anti-static. Will not crack or yellow. Leaves surfaces with a natural like-new finish.

**AUTO AIR FRESHENER**

A concentrated air freshener with sophisticated fragrance. Absorbs musty, stale, nicotine or offensive odours. A small amount sprayed into your car or onto carpets or seats will leave a long lasting and refreshing fragrance. Available in several fragrances.

**GLASS POLISH**

Streak-free window cleaner. Easily removes greasy finger marks, insects and general road grime. Safe on tint and other films.

**EXTERIOR**

**WASH**

**FAST CAR WASH**

Economical commercial strength vehicle wash that provides easy rinsing.

**PREMIUM CAR WASH**

Concentrated, high foaming car wash. Streak-free formula floats away road grime effortlessly. Contains special anti corrosion additives.

**FLEET WASH**

A highly concentrated bus and truck wash. Efficiently removes heavy road grime, exhaust stains, bugs etc. Can be applied manually, by high pressure water blaster or through an automatic washing facility.

**WINDSCREEN WASH ADDITIVE**

Removes road haze, oily residues, smudges and bugs from windcreens during automatic screen washing. Lubricates wiper blades and helps prevent shudder. Leaves windcreens crystal clear and clean.

**WASH & WAX**

New technology superior formula that gently cleans and protects car surfaces in one operation.

**POLISH**

**MASTER WAX**

A new generation rejuvenating polish that will restore the oldest paintwork back to showroom shine. Non abrasive and easy to use.

Suitable for all new car finishes.

**SHOWROOM SHINE**

A spray on wipe off polish. Excellent for new cars or sound paintwork - extremely easy to use. Leaves a deep look shine.

**PAINT PROTECTION**

**NEUTRALISING WASH – Part 1**

Creates an electrolytic change to paintwork to prepare the surface for the Nano Protective Coating (part 2).

**NANO PROTECTIVE COATING – Part 2**

A concentrated formula of organic polymer/nano particles that provide paint protection for motor vehicle paintwork, caravans, motor homes,

and aircraft.

**WHEEL & TYRE**

**ALLOY WHEEL CLEANER**

Non-acidic formula for the efficient removal of grime and brake dust from all alloy wheels. Spray on hose, off application. Ideal for spoked and highly polished wheels.

**TYRE SHEEN**

Long lasting natural gloss tyre shine. Restores and rejuvenates all tyre and rubber surfaces. Excellent for boot, floor mat and under bonnet rubber.

**SOLVENTS & DEGREASERS**

**HD DEGREASER**

A general purpose degreaser. Ideal for removing heavy grease and soils from under bonnets, around door trims, boots and engine bays. Great as a pre-spray before washing to soften and remove bird droppings, insects, brake dust, and heavy road grime. Non-caustic and safe to use.

**SOLVENT DEGREASER**

A heavy-duty solvent based engine degreaser. Dissolves grease and tar instantly then washes off with water. Safe on paintwork and aluminium. Removes the heaviest grease with ease.

**SOLVENT DEWAXER**

Removes stubborn pre-delivery wax. Simply wash on, hose off.

**PREP SOLVENT**

Highly efficient wipe on, wipe off solvent formula. Excellent for removal of pre-delivery wax, internal glue residues and excess anti-corrosion treatment.

**NON SOLVENT DEWAXER**

A unique alternative for deaxing new motor vehicles. The ideal environmentally user friendly replacement for petroleum solvents. Safe and economical in use.

**UNDERBONNET**

**FUEL SYSTEM**

**PETROL TREATMENT**

An advanced technology product that is very effective at removing petroleum gum, wax and varnish products. Suitable for use with all grades of petrol, it cleans dirty fuel systems and resists formation of further deposits. Contains an upper cylinder lubricant, and removes hard deposits from valves and combustion chambers.

**DIESEL TREATMENT**

An advanced technology product that provides superior absorption, and preventing wax and varnish deposits and microbiological growth. Used on a regular basis it drastically reduces black smoke emissions, and improves performance and economy, and lubricates and cleans injector pumps and plungers.

**OCTANE BOOSTER**

A super concentrated formula that immediately improves performance and prevents engine damage caused by detonation (“pinging”). Also an effective fuel system cleaner that contains an upper cylinder lubricant and decarbonising additives.

**INJECTOR CLEAN**

A super concentrated product that addresses the need to keep fuel injector passages surgically clean. Safe for oxygen sensors and catalytic converters, it also removes water from the fuel system and lubricates metal components.

**ENGINE TREATMENT**

A blend of penetrants, lubricants and sludge dispersants formulated for use in all petrol and diesel engines to ensure maximum removal of oxidised oil, sludge and other contaminants. Use at every oil change.

**ENGINE OIL TREATMENT**

A blend of surface modifying lubricants and anti-corrosion agents formulated specifically to reduce metal to metal friction between all moving parts. Dramatically reduces wear and increases lubricating oil life. Provides excellent protection from dry start-up wear.

**COOLING SYSTEM**

**HIBITEC**

A new technology scale and corrosion inhibitor for engine cooling systems. A unique product that maintains cooling systems at real efficiency.

**HIBITRON**

Combines the anti freeze properties of ethylene glycol with the unique protection properties of Hibittec to maintain cooling systems at non-acidic, solventless and biodegradable, this product will remove sludge, grease and scale from cooling systems without damaging cast iron or aluminium alloys. It is compatible with water pump seals and all rubber and plastic components. Cleans in one application without the need for a neutraliser.

**RADIATOR FLUSH**

Non-acidic, solventless and biodegradable, this product will remove sludge, grease and scale from cooling systems without damaging cast iron or aluminium alloys. It is compatible with water pump seals and all rubber and plastic components. Cleans in one application without the need for a neutraliser.

inhibitor.

Can also be added to anti-freeze type coolants as a supplementary copper, tin and lead. Resists foaming, scale formation and electrolysis: reduce the corrosion of steel, cast iron, aluminium alloys, brass, systems that contains a pH buffered blend of additives known to

**RADIATOR TREATMENT**

A superior general purpose coolant based on Hybrid Additive technology, which is a selectively balanced mixture of organic and inorganic additives. Meets and exceeds most OEM specifications (including Ford and GM) and provides excellent protection of all cooling system components.

**AUTOMATIC TRANSMISSION**

**AUTOMATIC TRANSMISSION TREATMENT**

A professional strength formula of anti-oxidants, detergents, inhibitors, lubricants and seal conditioners. Eliminates and prevents harsh shifting and stops and prevents oil leaks due to dry or hardened seals. Ideal for heavy duty applications such as towing or stop-start city driving.

**POWER STEERING TREATMENT**

Simply added to the power steering oil reservoir, this product will reduce steering shudder and noise, stop and prevent fluid leaks and protect expensive components from premature wear.

**LUBRICANTS & CLEANERS**

**BRAKE CLEANER**

Makes the job of removing brake fluid, grease, oil, dust and sludge from brake and clutch components easy. Reduces brake squeal and is non-flammable. Ideal for cleaning electrical components, tools and equipment. Leaves no residue and is dry in seconds.

**MRL ( Moisture Repellant Lubricant)**

A multi-purpose lubricant that frees seized or rusted parts, lubricates moving parts, dries wet ignitions and protects metal surfaces against corrosion.

**DEGREASER**

A professional grade high tech product formulated to dissolve grease and oil off most surfaces. Ideal for engines, motorcycles, garage floors and driveways, hard tools and barbecue hot plates. Washes off with water.

**CARBURETTOR CLEANER**

Quickly blasts away gum and deposits from internal and external surfaces of carburettors without having to disassemble, providing improved performance and economy. Also ideal for cleaning throttle bodies on fuel injected vehicles.

**PRO LUBE**

A silicone oil based lubricant ideal for use where petroleum oils cannot be applied because of staining, residue or temperature considerations. Leaves a non-oily and relatively dry protective coating that will not melt, freeze or burn. Ideal for metal, plastic, wood and most fabrics, it is non-flammable and non-staining.

**WORKSHOP**

**WORKSHOP GENIE**

A powerful liquid floor and hard surface cleaner that emulsifies oil spills. Ideal for use on painted floors.

**CLEEN HANDS**

An industrial hand soap for mechanics and other heavy industries. Water based with citrus solvents and skin conditioners to prevent hands drying out. Removes the toughest grease, waxes, oils, fresh paints etc.
